PROFESSIONAL SUMMARY

Front-End Developer with hands-on experience in React.js, TypeScript, JavaScript, Redux Toolkit, React Router, Vite, HTML, CSS, and Tailwind CSS. Skilled in building responsive web applications, reusable component architectures, API integration, state management, authentication systems, and enterprise-grade user interfaces. Experienced in collaborating with cross-functional teams to develop scalable solutions and improve application performance. Passionate about modern frontend development, user experience, and writing clean, maintainable code.

SKILLS

Programming: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, React Router, HTML5, CSS3, Tailwind CSS, React Flow

Tools & Platforms: Git, GitHub, JIRA, Vite, MySQL

State Management: Redux and Context API

AI/ Computer Vision: Machine Learning, OpenCV, MediaPipe, YOLO

Methodologies: Agile/Scrum Methodologies.

WORK EXPERIENCE

Photon Interactive Pvt Ltd, Chennai

[Aug 2024 – present]

Internship (Aug 2024 – May 2025)

- Designed and optimized prompts to improve the accuracy and relevance of AI-generated responses.
- Collaborated with developers to integrate AI-powered features into applications and internal tools.
- Implemented real-time eye tracking and gaze estimation techniques using OpenCV, MediaPipe, and YOLO.
- Contributed to improving model efficiency and user experience through testing, debugging, and iterative enhancements.
- Evaluated AI model outputs and refined prompts to enhance response quality and consistency.

Front-End Developer (June 2025 – present)

Photon Interactive Pvt Ltd, Chennai

Project 1: Photon.ai – Agentic AI Platform

Role: Front-End Developer

Development of a complete enterprise-level Agent platform and monitoring system.

- Enterprise web app for an AI / agent platform — React 19 + TypeScript on Vite, with MSAL sign-in, Redux (Toolkit + saga + persist), routing, and a large atomic-design UI kit

(atoms through pages) that powers chat/code flows, operations dashboards, admin screens (e.g. roles), and project management (lists, KPIs, modals, filters).

- Centralized HTTP calls in a reusable hook/wrapper for loading, error, and data state, reducing duplicated fetch logic across pages and modals.
- Contributed to a scalable front-end foundation using React 19, TypeScript, Vite, Redux Toolkit, redux-saga, redux-persist, and React Router for enterprise-grade state, auth, and navigation patterns.
- Enterprise web app MSAL sign-in, Redux (Toolkit + saga + persist), routing, and a large atomic-design UI kit that powers chat/code flows, operations dashboards, admin screens (e.g. roles), and project management (lists, KPIs, modals, filters).
- Integrated enterprise SSO (MSAL) with token exchange, Redux auth, and protected routing alongside password login.
- Integrated orchestration run monitoring with save/deploy actions, status polling, progress feedback, and workflow-state updates inside the super-agent authoring experience
- Designed and supported agent orchestration as a visual workflow: users compose multi-agent / “super-agent” flows in an interactive React Flow canvas (custom node types, connections, save/run against orchestration APIs), with run progress and status surfaced in the orchestration experience.

Project 2: Program Plan Builder (Internal Tool)

Role: Front-End & Python Developer

A web-based tool that automates project planning by generating sprint-wise plans, resource allocation, and downloadable reports

- Developed dynamic and reusable UI components using React for efficient project planning workflows.
- Implemented features for Excel data upload, parsing, and visualization in the user interface.
- Designed interactive forms and layouts to configure tracks, sprints, and project parameters.
- Enhanced user experience by managing state efficiently and ensuring smooth data rendering across components.
- Developed 20+ reusable React components, reducing development effort by 30% and improving UI consistency across multiple modules using React for efficient project planning workflows.

EDUCATION

Bachelor of Engineering – Computer Science Engineering

- Sathyabama Institute of Science and Technology, Chennai
2020 – 2024 | CGPA: 8.23/10
